## EXPERTISE

- Information Technology
- Communication Skills
- Web Development
- UI/UX
- Data Analysis
- Graphic Designer

## LANGUAGE

English

Bangla

Urdu

## ABOUT ME

I'm a Creative Computing student at Bath Spa University who blends IT logic with full-stack web development and graphic design. I specialize in building secure database systems while crafting clean, user-friendly digital visuals. I love connecting complex backend engineering with sleek, modern design.

## PROJECT EXPERIENCE

### Group Debate Project, 2024

#### Emerging Technologies

Analyzed the market growth and cloud computing integration within the E-sports industry. Participated in high-level group debates regarding the technological and ethical impacts of competitive gaming. [Link.](#)

### LUXE. - Luxury Website E-Commerce Platform, 2025

#### Tomorrow's Web - Individual Assignment

Developed a full-stack luxury e-commerce site using HTML, CSS, JavaScript, and Node.js with a secure authentication system and custom API. Focused on minimalist UI/UX design to deliver a premium digital shopping experience. [Link.](#)

### Arduino Hardware Project, 2026

#### Physical Computing

Built an interactive Arduino hardware system incorporating environmental sensor arrays and LED indicators. Developed detailed circuit diagrams and documented system logic flows between hardware and C++ source code. [Link.](#)
